PA 12 WHITE

Current Supplier's Material: PA 650

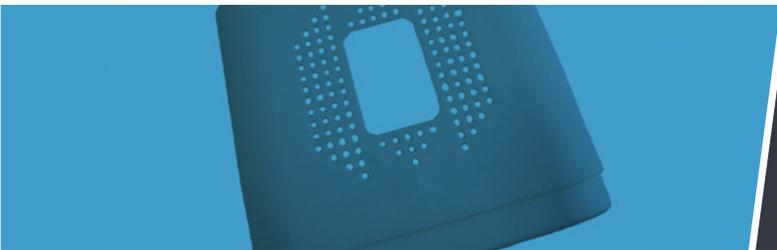

PRODUCT DESCRIPTION

PA 12 White is an economical material choice for functional prototypes and end-use parts. It offers high impact and temperature resistance, is very durable, and remains stable under a range of environmental conditions. The nylon material exhibits a white finish with a slightly rougher surface texture compared to other nylons.

APPLICATIONS

The material's high strength is ideal for jigs and fixtures, housings, and other functional parts. It also has a low coefficient of friction, making it suitable for many types of gears and bearings.

KEY PRODUCT BENEFITS

- Strength and stiffness
- Well-balanced material properties
