

Assembly Evaluation Template

Protolabs is able to offer a number of post-molding services under the umbrella of “Assembly”. This includes, but is not limited to, labeling parts with customer supplied or Protolabs printed labels, serialized labels applied to parts or packaging, customer specific or supplied packaging, assembling parts to each other, installing inserts, pins, or other fasteners, “kitting” multiple parts together in boxes or bags for end user installation, and more. Protolabs is not able to offer assembly of electronic components or circuit boards, and any project involving the application of adhesive must be evaluated on a case by case basis. Please fill out the below, and we’ll consider the request.

Describe the work needing to be performed in detail.

Please attach or include any prints, pictures, or other documentation you have regarding the work to be performed.
